Both

- Curved stair rails are designed for steps up to 5 tread with the rail for the top 2 treads being straight.

- Rails may be used from a 6½" rise to 8½" rise. Run may be from 10½" to 12".

- Any part of the rails may be used for less number of treads. Caution must be taken to cut from same location for all four rails.

RADIUS = 10 feet

RAIL LENGTH = 8 feet
